Computer Science student at PUCIT focused on backend and full-stack web development with Django and MERN. Building production systems with real authentication, deployment, and CMS integrations, alongside applied AI/ML projects using retrieval and computer-vision pipelines.

EDUCATION

Punjab University College of Information Technology (PUCIT)

Lahore, Pakistan

Bachelor of Science in Computer Science

Sep 2023 – Jun 2027

- Cumulative GPA: 3.43/4.0 | Merit Scholarship Recipient (PEF, 2023–Present)

EXPERIENCE

Django Developer Intern — Evolvedash

Jul 2026 – Present | Onsite

- Rebuilt the company's legacy WordPress blog as a custom Django + Wagtail CMS platform, combining a hand-built Blog model with Wagtail-authored pages into one unified feed.
- Implemented user authentication, a social follow system, and public/followers-only post visibility controls.
- Deployed the application to production on AWS EC2 using Gunicorn as a systemd service and Whitenoise for static asset serving, fully replacing the site's previous managed WordPress hosting.

Front-End Developer Intern — DevelopersHub Corporation

Jul 2025 – Aug 2025 | Remote

- Developed front-end features and admin functionality for a live, production e-commerce platform.
- Built product and order management flows, including Cloudinary-based image uploads, replacing manual catalog updates with a streamlined admin workflow.
- Audited and fixed layout and performance issues across mobile and tablet breakpoints, eliminating broken layouts on smaller screens.

PROJECTS

AI FitStyler — AI Fashion Recommendation System

Python · Scikit-learn · FAISS · MediaPipe · OpenCV · JavaScript

<https://github.com/meryem-cmd/fitstyler>

- Built a multi-agent system for personalized outfit recommendations using body-shape and skin-tone detection via MediaPipe.
- Designed a RAG pipeline with embedding-based semantic retrieval using FAISS and HuggingFace embeddings for fast, context-aware outfit search.
- Built an interactive Streamlit UI with AI-generated trend insights, replacing manual outfit-search with a single guided recommendation flow.

Enchanted Trinkets — Full-Stack E-Commerce Platform

Node.js · Express.js · MongoDB · Cloudinary · JavaScript

https://github.com/meryem-cmd/enchanted_trinkets

- Designed role-based dashboards (Manager, Employee, Customer) with tailored access controls and REST APIs.
- Integrated Cloudinary for image hosting and built a batch-upload workflow, replacing one-by-one manual product entry.

Django Blog App

Python · Django · Wagtail CMS · Bootstrap 5 · SQLite

<https://github.com/meryem-cmd/django-blog-app>

- Built a dual content system merging a custom Blog model with Wagtail-authored pages into one unified feed, with a social follow system and public/followers-only visibility.
- Configured production-ready static file serving with Whitenoise and deployed to AWS EC2 with Gunicorn as a systemd service.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, C++, C, Kotlin, HTML5, CSS3

Frameworks & Libraries: Django, React, Node.js, Express.js, Flask, Spring Boot, Tailwind CSS

AI & Data: LangChain, FAISS, HuggingFace, OpenCV, Scikit-learn, NumPy, Pandas, Streamlit

Databases: MongoDB, MySQL, SQLite

Tools: Git, GitHub, Postman, VS Code, Jira, Figma, Canva

ACTIVITIES

Media Team Member — EMS Society, PUCIT

2023 – Present

- Designed promotional posters and digital content for university events, supporting outreach across the society's social media channels.

COSMICON (Tech Event by PUCIT)

Lahore, Pakistan

- Co-organized the Web Hackathon with 100+ participants, ensuring smooth end-to-end operations.
